

Position: Senior Medical Science Liaison – Allergy/Food Allergy/Immunology (US)

Reports to: Associate Director, MSL (Eastern)

Location: Great Lakes/Midwest: MI, IL, IN, WI, MN, ND,SD, NE, IA, MO

Summary

The Senior Medical Science Liaison (Sr. MSL) is part of a regionally focused therapeutic area MSL team, who reports into the AD MSL. The focus of this role is field-based scientific exchange (SE), for which the Sr. MSL will leverage their scientific background, industry knowledge, and business acumen to act as a scientific resource to Scientific Experts (SCEs), while gathering insights that inform Scientific Objectives and strategic decision-making by Medical Affairs. Within their territory MSLs are responsible for establishing, cultivating, and maintaining relationships with SCEs. Further, MSLs function as an extension of the medical information group to provide product and pipeline therapeutic area expertise to SCEs and HCPs, and as a scientific expert to internal stakeholders within Medicine and Commercial groups.

The Sr. MSL is a collaborative member of the field based team, who is expected to communicate seamlessly with other members of the field based organization. In this role, you will contribute to the discovery, development and delivery of our products to our patients and customers. Our global presence provides opportunity for all employees to collaborate internationally, offering visibility and opportunity to directly contribute to the company's success.

Specific Responsibilities:

Customer Interactions and Scientific Exchange:

- The principal effort of the Sr. MSL will be focused on planning, preparing for, and conducting field based interactions and scientific exchange in support of the TA Scientific Objectives (SOs). Specific aspects of the role include:
 - Proactively conduct scientific exchange with SCEs to support the SOs; as guided by their tactical medical engagement plan
 - Establish and maintain scientific relationships with SCEs, while developing a strong understanding of territory specific healthcare systems and clinical practices related to patient care, disease management, treatment protocols, and research interests
 - Act as a scientific resource to SCEs and HCPs to reactively answer specific questions on TA or disease state topics and Aimimmune's compounds through scientific exchange
 - Provide disease state education on topics related to TA Scientific Objectives
 - Act as a scientific resource to Scientific Experts at payer accounts and integrated delivery networks when requested

Collaboration:

- The Sr. MSL collaborates with the field based medicine team, appropriate Commercial personnel, and the broader organization – in a seamless and efficient manner. Specific aspects include:

- Collaborate within the TA MSL Team, on all aspects of planning, execution, sharing of best practices, and insight generation related discussion in order to understand the breadth of insights, potential impact, and to stimulate scientific exploration
- Collaborate to provide field based scientific expertise for key accounts, as required
- Learn about new and evolving customers and the changing medical needs of such customers
- Collaborate with Commercial personnel to provide scientific support for internal and external activities where there is a defined and appropriate scientific role for FBM
- Collaborate with the broader Medicine organization to provide scientific support and communicate scientific insights

Planning and Support:

- Develop a tactical customer-centric medical engagement plan for your geography and provide internal and external scientific support. Specific aspects of the role include:
 - Proactively develop a territory specific medical engagement plan for scientific exchange with prioritized SCEs, which supports the TA Scientific Objectives (SOs)
 - Identify and communicate challenging gaps between Aimmune and customer expectations, needs, and priorities
 - Develop scientific materials to support scientific exchange, as directed by MSL Team Lead
 - Maintain regular communication with the regional TA MSL Team, to review ongoing activities and insights, share best practices, and communicate learnings
 - Interact with current Aimmune study investigators to maintain site engagement and address any unsolicited trial related questions, and with potential study investigators to discuss potential Aimmune study concepts or protocols, as requested
 - Facilitate logistical communications between Aimmune and HCPs regarding Investigator Initiated Studies (IIS), External Collaborative Research, and company study contracts, as requested
 - Provide additional scientific support for Medicine and Scientific Affairs activities

Insight Generation and Reporting:

- Identify, document, discuss, and communicate scientific insights as guided by the TA Scientific Objectives. Specific aspects include:
 - Document field generated scientific insights within appropriate system(s), and communicate to appropriate internal stakeholders, as required
 - Participate in the discussion of scientific insights gathered by the TA MSL team, in order to understand the breadth of insights, potential impact, and to stimulate scientific exploration, as directed by management to support communication of scientific insights across the Medical and Commercial organizations
 - Identify and communicate operational understanding of healthcare systems with field based Aimmune team members, including changes in the healthcare landscape and trends impacting delivery within the territory (i.e. new stakeholders impacting the delivery of or access to care)
 - Assist with scientific insight analysis efforts by reviewing and collating individual reports across the TA team

Qualifications / Requirements:

- 8+ years of experience related to Aimmune's therapeutic focus in allergy, asthma, immunology including at least 1 year in an MSL role

- Advanced science / clinical degree preferred (PharmD, M.D., DO, Ph.D., DNP) with one (1) or more years' of relevant clinical or therapeutic experience (preferred), OR
- Masters level degree (MS - FNP), from an accredited institution, in health sciences with three (3) or more years' of relevant clinical or therapeutic area experience
- Knowledge of regional specific healthcare systems and clinical practices related to patient care – preferred
- 2 years of experience in supporting managed care organizations – preferred

Preferred Experience, Special Skills, Knowledge:

- Strong communication and relationship development skills
- Able to readily interpret scientific data, understand the potential impact of data on clinical approaches and research needs, and communicate scientific data to broad audiences
- Position is field-based with over 50% required travel to manage assigned geography. Easy access to large hub airport desired. States aligned with territories may change based on company priorities
- Ability to use field-based electronic or other communication tools for all aspects of job
- Highly preferred the candidate lives within the territory; no relocation assistance offered for this position

About Aimmune Therapeutics, Inc.

Aimmune Therapeutics is a clinical-stage biopharmaceutical company founded to address the unmet medical need in food allergy, which currently has no approved treatments. Our mission is to improve the lives of people with food allergies, based on our proprietary desensitization treatments in development. Aimmune's lead investigational drug, AR101 for peanut allergy, is in Phase 3 clinical testing in North America and Europe. The company also plans to begin clinical testing of its investigational drugs for egg allergy and walnut allergy. Headquartered in Brisbane, California – the heart of San Francisco's biotechnology hub – Aimmune has additional offices in the Kings Cross area of London and in Raleigh, North Carolina.

Qualified candidates should forward a resume and cover letter, including a statement of interest, availability, and experience to Human Resources (careers@aimmune.com) with the job title in the subject line.

Aimmune Therapeutics is an Equal Opportunity Employer.
