

Position: Contract Analytical Development & Quality Control (QC)
Reports to: Associate Director, Analytical Development and/or Quality Control
Location: Brisbane, CA

Summary

The Analytical Development & QC professional will be a contract member of the Analytical and QC Team and will support activities associated with quality control and stability testing of Aimmine's APIs and drug products. Prior experience with quality control release/stability testing of pharmaceutical products and the demonstrated ability to work effectively in a virtual quality control testing environment are requirements for the position.

Specific Responsibilities:

- Support the transfer of analytical methods to CTL's for protein based products. These may include HPLC, ELISA and other methods
- Support the preparation of phase-appropriate stability protocols and stability reports for API and drug product in accordance with regulatory requirements and as needed to support clinical trials and regulatory submissions
- Write, review and approve Analytical Development and Quality Control SOPs, specifications, method validation and verification protocols and reports and technical reports
- Analyze and review quality control release and stability testing data of Aimmine's pharmaceutical products at Contract Testing Laboratories (CTLs) and/or Contract Manufacturing Organizations (CMOs)
- Monitor, trend, and interpret stability data, as necessary, for Aimmine products
- Prepare and review stability tables and trend charts for internal reports and regulatory submissions
- Review and approve out-of-specification (OOS) and out-of-trend (OOT) testing results, deviations
- Work collaboratively with manufacturing/supply chain, quality assurance and project management to ensure timely availability of lot release and stability data and to ensure adequate planning for stability supplies

Qualifications / Requirements:

- B.S. or advanced degree in Chemistry, Biochemistry, Analytical Chemistry, or a related field with at least 8-10 years relevant experience

Preferred Experience, Special Skills, Knowledge:

- Ability to effectively prioritize and deliver on tight timelines
- Excellent written and verbal communication skills
- Expertise in use of Excel or comparable software solutions for management of stability data
- Accuracy and attention to detail
- Experience with JMP and/or Minitab is desirable
- Excellent cross-functional team participation skills
- Ability to be flexible with changing work needs

About Aimmune Therapeutics, Inc.

Aimmune Therapeutics is a clinical-stage biopharmaceutical company founded to address the unmet medical need in food allergy, which currently has no approved treatments. Our mission is to improve the lives of people with food allergies, based on our proprietary desensitization treatments in development. Aimmune's lead investigational drug for peanut allergy, AR101, is in Phase 3 clinical testing in North America and Europe. Headquartered in the heart of San Francisco's biotechnology hub, Brisbane, California, Aimmune has additional offices in the Kings Cross area of London, and in Raleigh, North Carolina.

Qualified candidates should forward a resume and cover letter, including a statement of interest, availability, and experience to Human Resources (careers@aimmune.com) with the job title in the subject line.

Aimmune Therapeutics is an Equal Opportunity Employer.
