- Thorough understanding of GCP and familiarity with relevant FDA and ICH guidance
- Working knowledge of statistics as applied to clinical trial design and analysis

Preferred Experience, Special Skills, Knowledge:

- Level and title for the position will be determined by the qualifications and experience of the candidate
- Experience in writing and editing scientific research reports
- Experience of contributing to the clinical sections of a marketing authorization application
- Experience in allergy, asthma, or immunology preferred

About Aimmune Therapeutics, Inc.

Aimmune Therapeutics is a clinical-stage biopharmaceutical company founded to address the unmet medical need in food allergy, which currently has no approved treatments. Our mission is to improve the lives of people with food allergies, based on our proprietary desensitization treatments in development. Aimmune's lead investigational drug, AR101 for peanut allergy, is in Phase 3 clinical testing in North America and Europe. The company also plans to begin clinical testing of its investigational drugs for egg allergy and walnut allergy. Headquartered in Brisbane, California – the heart of San Francisco's biotechnology hub – Aimmune has additional offices in the Kings Cross area of London and in Raleigh, North Carolina.

Qualified candidates should forward a resume and cover letter, including a statement of interest, availability, and experience to Human Resources (careers@aimmune.com) with the job title in the subject line.

Aimmune Therapeutics is an Equal Opportunity Employer.
