

Position: Clinical Scientist, Europe (3, Clinical Science)

Reports to: VP, Clinical Development

Location: London, UK

Summary

The Clinical Scientist will be responsible for working as part of the medical team to design, execute and report clinical trials in food allergy. The role requires an individual with a desire to deliver high quality work and a strong attention to detail. This is a Clinical Trials role and not laboratory based.

Specific Responsibilities:

- With a focus on medical scientific integrity and data quality
- contribute to execution of clinical studies in food allergy
- A key member of the team creating study protocols, executing studies and designing and delivering data cleaning and analysis
- Provide scientific expertise to support to study teams and participate in multidisciplinary meetings
- Under physician guidance perform medical monitoring of clinical trials
- Contribute to key clinical documents, including protocols, study reports and regulatory responses and submissions
- Contribute to scientific publications
- Work closely with Regulatory, CMC, and Clinical Operations counterparts

Qualifications / Requirements:

- A degree (for example PhD, PharmD) combined with at least 2 years direct industry experience in the execution, analysis and reporting of Phase 2/3 clinical trials **is required.**
- Working knowledge of statistics as applied to clinical trial design and analysis
- Experience in writing and editing scientific research reports
- Thorough understanding of GCP and familiarity with relevant FDA and ICH guidance
- Experience in allergy, asthma, or immunology preferred

Preferred Experience, Special Skills, Knowledge:

- Dedication to the conduct of clinical trials that generate high quality data and ensure patient safety
- Collaborative and accessible
- Strong commitment to goals and timelines
- Ability to absorb new information quickly and gain command of relevant literature
- Preference for working in a fast-paced, team-oriented, environment
- Desire for new professional challenges
- Possessing excellent problem-solving & decision-making skills; strives for appropriate balance between taking initiative and seeking input from others

- Ability to analyze and summarize complex data and information concisely
- Excellent written and verbal communication skills, including fluency in English

About Aimmune Therapeutics, Inc.

Aimmune Therapeutics is a clinical-stage biopharmaceutical company founded to address the unmet medical need in food allergy, which currently has no approved treatments. Our mission is to improve the lives of people with food allergies, based on our proprietary desensitization treatments in development. Aimmune's recently announced positive top-line data from its pivotal Phase 3 PALISADE trial for AR101, the company's lead investigational drug for peanut allergy. Headquartered in the heart of San Francisco's biotechnology hub, Brisbane, California, Aimmune has additional offices in the Kings Cross area of London, and in Raleigh, North Carolina.

Qualified candidates should forward a CV and cover letter, including a statement of interest, availability, and experience to Human Resources (careers@aimmune.com) with the job title in the subject line.

Aimmune Therapeutics is an Equal Opportunity Employer.
